(SUBTLE ATTACKS against the FAMILY EXPLAINED)

Ever wondered why we see today ...

...destruction of family values?
...promiscuity, teenage pregnancy, abortion on the rise?
...surplus food in rich nations thrown away (not shipped to poor countries)?
...100 countries on the road to extinction?
...6,000 Filipinos leave the country daily?
...foreign loans include contraceptives?
...many who claim they want to stop AIDS never promote premarital abstinence and marital fidelity, which are the cheapest and only way to stop AIDS?
...imminent shortage of nurses and teachers in RP?

Were you deceived into thinking that ...

...the IUD is always a contraceptive?
...life begins at implantation, not fertilization?
...“safe sex” is safe?
...condoms will stop spread of AIDS?
...Sex Ed is primarily about sex?
...the world is overpopulated?
...adolescents are promiscuous, thus they NEED contraceptives; but since contraceptives fail, they NEED abortion?
...the Billings and Sympto-thermal (i.e., natural) methods of fertility awareness are inaccurate for irregular cycles?
...the cause of poverty is overpopulation (and not graft and corruption)?
